Brainstorm & Idea Prioritization Template:

Brainstorming is an essential step in developing the **Virtual Agent–Driven SLA Breach Awareness & Justification System**. It provides a collaborative environment where team members can discuss the challenges of manual SLA monitoring and generate innovative solutions using the ServiceNow platform. The objective is to identify practical ways to automate SLA tracking, provide early breach notifications, simplify justification collection, and improve overall incident management.

During brainstorming, the team focuses on understanding the existing problems, exploring different ServiceNow features such as **SLA Definitions, Flow Designer, UI Policies, Virtual Agent, Notifications, Reports, and Dashboards**, and evaluating how these components can work together to create an efficient and user-friendly solution. Every idea is encouraged, discussed, and refined to develop a reliable system that reduces manual effort, minimizes SLA violations, and improves service quality.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
