

Ideation Phase

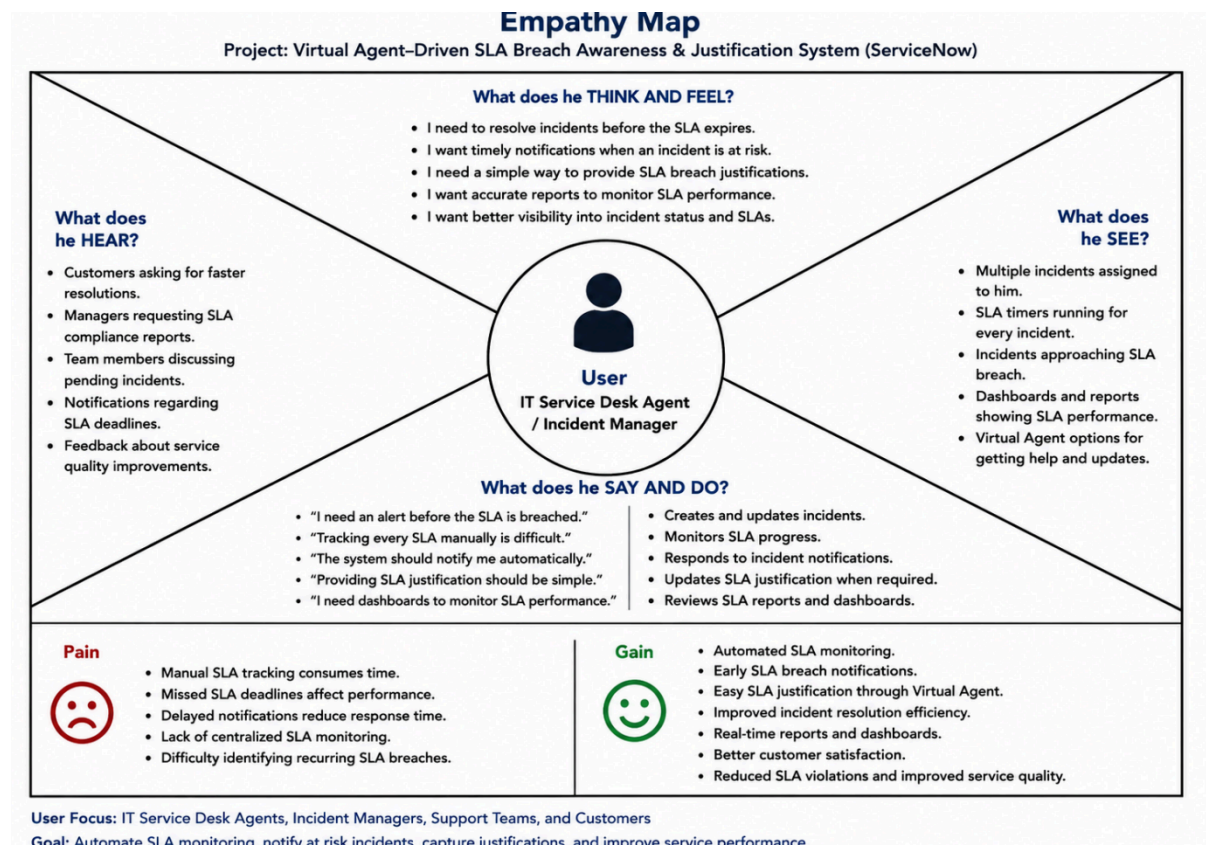

Empathize & Discover

Date	10 July 2026
Team ID	
Project Name	Virtual Agent–Driven SLA Breach Awareness & Justification System
Maximum Marks	4 Marks

Empathy Map Canvas:

The Empathy Map Canvas is used to understand the experiences, challenges, and expectations of the users involved in incident management within the ServiceNow platform. It helps identify the needs of IT service desk agents, incident managers, and support teams who are responsible for monitoring Service Level Agreements (SLAs). By understanding what users think, feel, say, and do during the incident management process, the project team can design an effective solution that automates SLA monitoring, sends timely notifications, collects SLA breach justifications, and improves overall service management.
