1. Purpose of Document

The purpose of this document is to summarize the User Acceptance Testing (UAT) results for the **Virtual Agent-Driven SLA Breach Awareness & Justification System**. The report describes the testing activities performed, defects identified and resolved, test case execution status, and overall readiness of the application for deployment. User Acceptance Testing verifies that the developed ServiceNow solution satisfies the functional requirements and business objectives related to SLA monitoring, notifications, Virtual Agent interaction, justification capture, and reporting.

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved
